Additional Points:

- 1) In future if there is a requirement of server and storage relocation from existing DC to other DC at BBCI or repositioning/replacing of RACKS the bidder must support the requirements and ensure completion of the task according to BBCI's specifications without any additional charges.
- 2) The entire PACS server and storage must integrated with BBCI's existing data center architecture & Network devices.
- 3) At present BBCI study volume 65000 annually. If in future study volume increases at that time the bidder has to increase the volume . If any charge applies for increasing the volume, the amount should be fixed for 10000-study volume during warranty & CAMC period and the same should be submitted in the commercial bid.
- 4) If in future SAN storage need to be increased in this scenario 10TB SAN storage need to integrate with the existing storage as mentioned in the bid. The amount should be fixed for additional 10TB storage during warranty & CAMC period and the same should be submitted in the commercial bid.
- 5) Any modifications needed in the PACS to meet BBCI requirements, such as changes to the IP address, storing and retrieving new data, or adjusting recurring services, must be implemented by the bidder at no additional cost.
